## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on February 13, 2002; March 26, 2002; April 11, 2002; April 22, 2002; and May 24, 2002 is acknowledged and has been considered by the Examiner.

### ***Terminal Disclaimer***

2. The terminal disclaimer is acknowledged and has been entered into the file.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 9-21, and 23-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barner, Sweden Patent SE462809 in view of Nelson et al. Patent Number 5,989,668.

Barner teaches all the limitations of the above claims except the panels being three distinct layers. Barner teaches at least two flooring panels (1) with a top surface, bottom surface, middle substrate, thickness within range of a flooring panel, grooves (21) extending the length of the panel and intersecting with groove on other side, channel (25) on bottom surface, parallel to groove (see Figure 4), geometry of a square, connector (15) extending the length of the panel and traverse (see Figure 5), and two flanges (13, 14) with top and bottom surface at an angled portion of zero degrees.

Art Unit: 3637

Nelson et al. teaches a flooring panel with three distinct layers of top decorative layer (34), foam substrate (35), and bottom layer (36). It would have been obvious for one skilled in the art at the time the invention was made to modify the Barner reference and use the Nelson panel of three separate layers to increase the waterproof properties of the flooring, since it is held to be within the skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of design choice.

***Response to Arguments***

5. Applicant's arguments with respect to claims 2, 9-21, and 23-25 have been considered but are moot in view of the new ground(s) of rejection.
